# Integrated Supply Chain Solutions

# End to End Services for International Cargo Movement

## Our work

Transportation of a new Cut to Length machinery from Pune to Australia

### Service Offered

- Sea Freight – FR containers

## Our work

Door-to-Door Movement of Containerized Cargo - India to Korea

### Service Offered

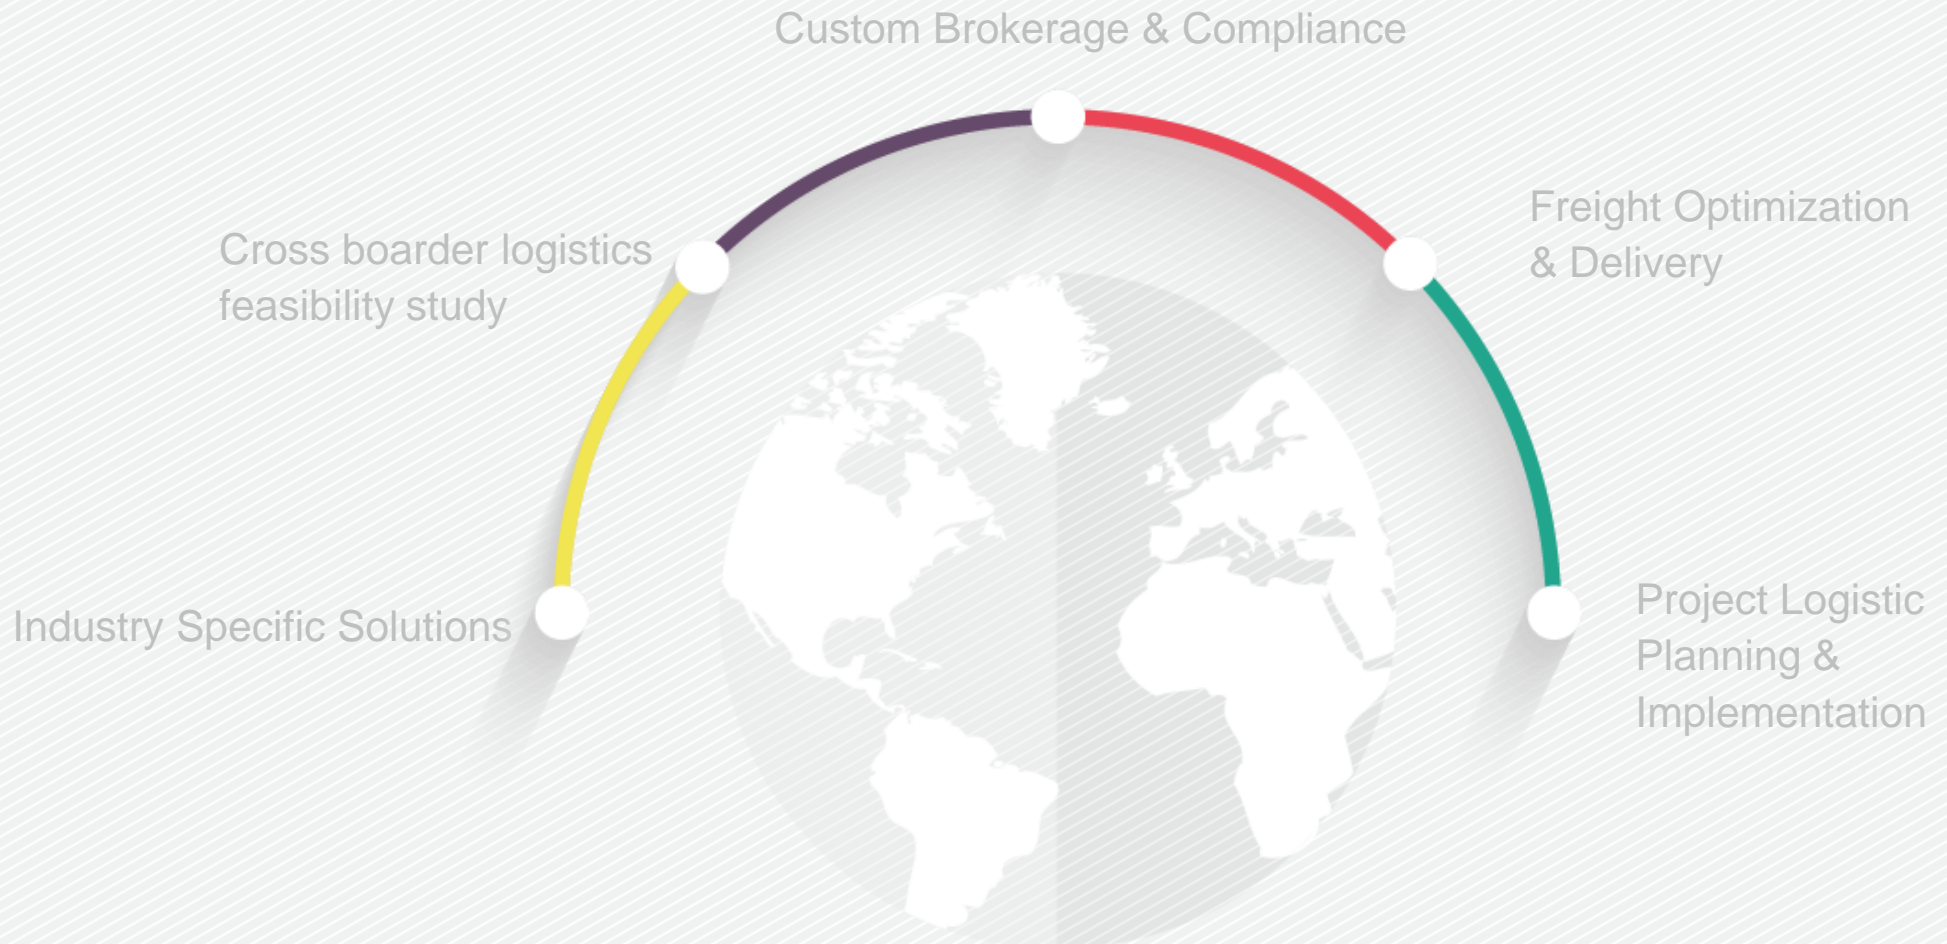

- Packing Design
- Industrial Packing
- Export Clearance
- Ocean freight (FCL)
- Destination Clearance
- Last mile Delivery

# Our work

## Door to Door Transportation

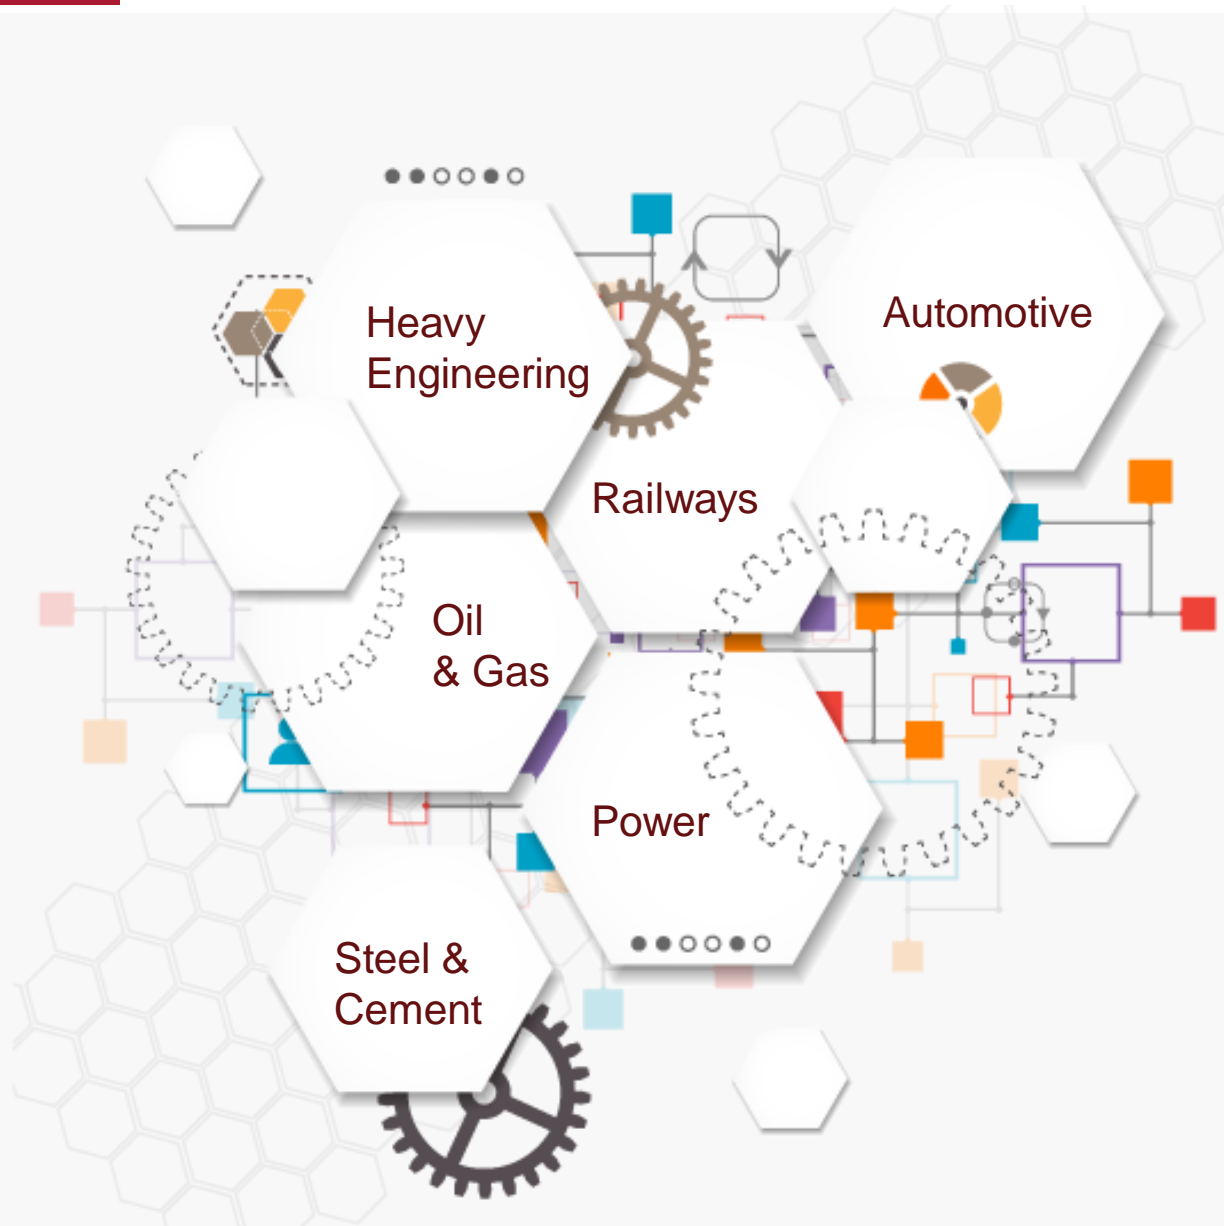

# Project Cargo Management

# Industry Sector Expertise

# Project

## Door to door - Movement of wind mills

Ocean Shipment from  
Vietnam to Gujarat

Gross Weight – 697.02 MT

Volume: 7720.19 CBM

# Project

## Multi Modal Transportation of E-Substation

Multimodal Shipment from Batam Island, Indonesia to Barmer,.

Gross Weight – 3500.02 MT

48 Modules of E Substations Max Dim (Mtrs) 17.03 x 6.03 x 4.79 @70 Mt

Volume: 20580.19 CBM

## Project

# Transportation of Balance of Plant (BOP) Cargo for 2 x 125 MW Gas Power Project

### Client

Client is an Indian MNC EPC Enterprise based in Singapore that undertake & execute turnkey EPC Contracts for development of Power Projects in various countries. The Project being set up of 2 x 125 MW Gas Power Station at Al-Anbar Province, Republic Of Iraq requires a reliable and experienced Company for transportation of Balance of Plant (BOP) from 20 different Origins around the globe to Al Anbar Province situated 900 km from the port of Umm Qasr in Southern Iraq with expertise in cross border international transportation & documentation with HSE, Security, Safety, Reliability, and Transit Commitments.

### Business Challenge

- Iraq poses a dynamic but very hostile and ever changing work environment. Devising an easy to understand and swift clearance & documentation process meeting government & regulatory requirements was a very big challenge.
- Dimensions and weight were another big challenge to transport the Transformer as overall dimensions and weight of loaded transformer were 12 m length x 4.00 m width x 6.20 m height and 140tons with adverse road conditions .Total of 2 transformers were to be moved.
- Arranging road transportation from Europe covering more than 3000 miles ,crossing many countries & managing documentation process to meet erection schedule at site.

## Transportation of Balance of Plant (BOP) Cargo for 2 x 125 MW Gas Power Project

### Procam's Role

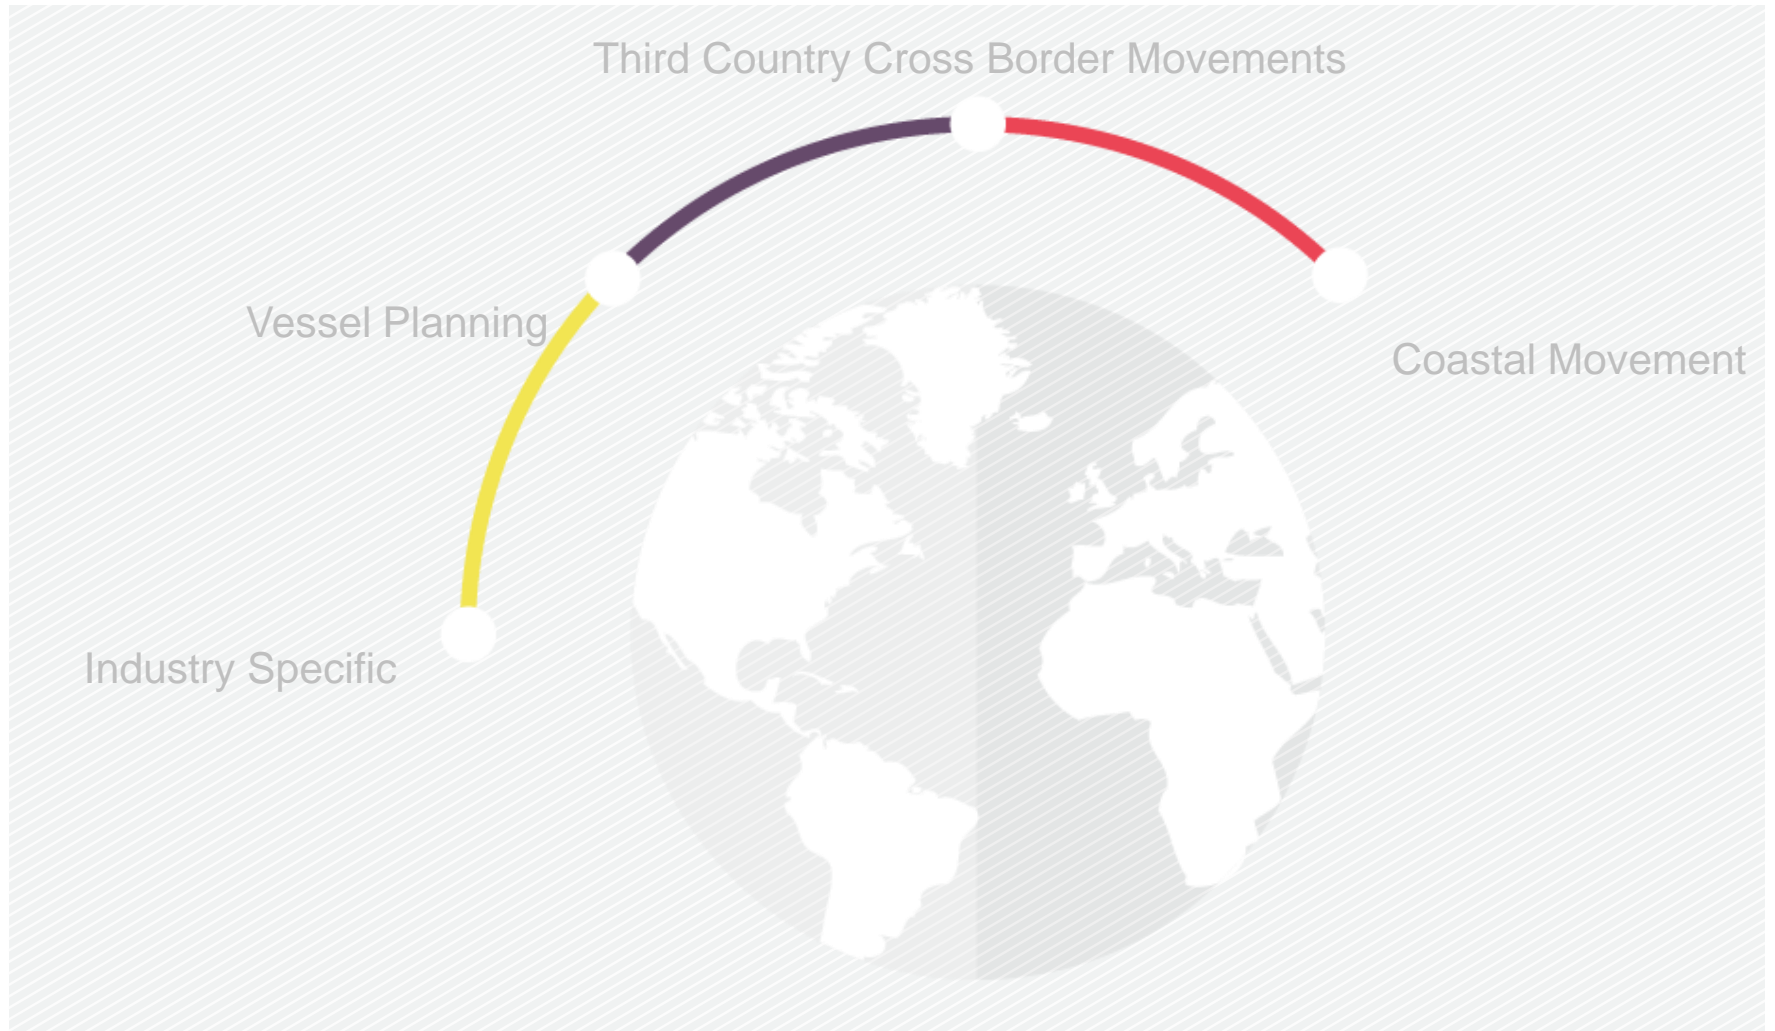

- Follow up with suppliers at 20 different origins for readiness of cargo
- Arranging Container Ships, Break Bulk Ships & special trailers for sea voyage & road movements
- Facilitating documentation & custom clearance at Umm Qasr Port
- Arranging normal trailers &Deployment of 2 sets of Hydraulic Trailers (10 axle line each) for transportation to site

### Client Benefits

- Single window solution with constant maintenance for Quality & Safety Standards
- Facilitation of DDP Delivery and smooth documentation process reducing the detention & demurrage risk/costs
- General & ODC Cargo transported totaling to 18000 Frt along with the transformers
- No transit loss or damages

# Vessels Chartering

## Project

## Door-To-Door Movement of Wind Blades

Longest Blades at 52 Mtrs (length) transported from China to India.

## Project

## Transportation of Locomotives (120 MT)

Door –to Door movement of 120 MT locomotives (6 Nos from India to Sri Lanka)

## Project

## Break Bulk Transport from Korea to Mumbai

1500 MT /3200 FRT

Max Wght: 85MT

Ocean movement by Breakbulk  
ship from Korea to India

# Project

## Loading on transformer on Mafi trailer to ship

RoRo movemnt of Heavy Transformers from  
India to Nigeria

## Project

# Transportation of Tanks from to Mumbai Port, and then to Santos, Brazil

Export of two Tanks  
[With Accessories] to Brazil

Gross Weight – 8 MT

DIM : L - 14395 X 2450 X  
2950 (MM)

## Procam Logistics' Asset Based Model

- give us advantage to perform end-to-end solutions with perfection

Equipment	Units	Quantity	Manufacturer
Hydraulic Axles	16 x 4 Axles	64 axle	VMT, India
